

gin by *Sebastian Herkner*

Sebastian Herkner imagines once again a series of coffee tables that you will love to share your space with, where he explores new aesthetics of glass. Pure shapes of glass create the geometric composition that make the tabletop and a simple base enhances the various finishes and colours of the glass. Available in three sizes, each table having its own composition made out of glass.

gin high + gin medium *by Sebastian Herkner* | TABLES
